

ARTICLE SUBMISSION DETAILS

Journal of Science and Humanities (*JoSH*) publishes original research papers, articles and book reviews in the English language treating any aspect of the science. Submissions are considered on the understanding that they are being offered solely for publication by the *JoSH*, which will retain copyright. All submissions are reviewed by referees and the *JoSH* Editorial Committee, and those accepted are normally published in order of receipt.

MANUSCRIPT PREPARATION

Language: Only English language manuscripts are accepted. *JoSH* allows authors to choose either British or American English styles to be used consistently throughout the manuscript.

Layout and Contents: Full Paper/ Communication / Review Article/ popular article shall contain the following headings:

1. Title: This should reflect the content of the manuscript and should be concise. It should be typed in capital with Times New Roman 12 font in capital letter. All the major headings should be left aligned and typed in times new roman 12 font bold except the first abstract.

2. Authors: Complete first and last names of all authors along with complete mailing address (including PIN, ZIP or postal codes, and country name), phone (including country code and area code), a working Email ID for each author should be provided. Ignore any titles, designations or degrees, etc. which appear before or after the name, e.g., The Honorable, Dr., Mr., Mrs., Ms., Rev., S.J., Esq., Ph.D., Md. etc.

If the first author is not the corresponding author, identify the corresponding author with an Asterisk. The author's name, postal address and email address should appear in italics at the end of the article.

3. Abstract: Not more than 250 words including key points from Methods and Results. It should be typed in Times new Roman 10 font size.

4. Key words: Maximum of ten words unless warranted.

5. Abbreviations: Expand all Abbreviations used in the text except the standard units of measurements. List them alphabetically.

6. Introduction: Must be crisp and include applicable history of the subject, state the problem, important literature review, the hypothesis, the need and the objectives.

7. Materials and Methods: Must include the dates of study, study area with map, design, programmes used and data analysis.

8. Results

9. Discussion & Conclusions

10. Acknowledgment: The "Acknowledgment Section" is the general term for the list of contributions, disclosures, credits, and other information included at the end of the text of a manuscript but before the references. The Acknowledgment section includes authors' contributions; information on author access to data; disclosure of potential conflicts of

interest, including financial interests, activities, relationships, and affiliations; sources of funding and support; an explanation of the role of sponsor(s); information on independent statistical analysis (if required); names, degrees, and affiliations of participants in a large study or other group; any important disclaimers; information on previous presentation of the information reported in the manuscript; listing of supplemental material; and the contributions, names, degrees, affiliations, and indication if compensation has been received for all persons who have made substantial contributions to the work but who are not authors. Authors must obtain written permission to include the names of all individuals included in the Acknowledgment section.

11. References

12. Tables

13. Figures: Illustrations, maps etc.

14. Images: Colour or black & white photographs, scans, radiographs, SEMs, raster maps etc.

15. Appendices

16. Author details: In case of Papers, Communications and Reviews within 50 word each. This should include author contributions to the paper.

17. Logos of home institutes and sponsors for Papers, Communications and Reviews: Authors wishing to highlight the home institutes and funding agencies are encouraged to send good quality and clear scans (JPEG or TIFF files) of institution logos. This facility is

not provided for Notes, Opinions, Book Reviews and Letters.

Manuscripts should be typed (preferably on computer), double-spaced on Letter or A4 in WORD document. Font size must be 12 points Times New Roman. Text should be justified; Footnotes should be avoided; All units of measurement should be in metric, or preferably SI units; All pages should be numbered; Tables and Figures should be numbered and captioned and included in separate pages at the end of the text; Original drawings and figures should be submitted; Photographs must be digitized and must be clear with no types, watermarks, emboss, or markings; Photo credit must be provided along with image caption; Spellings should be consistent with the type of English chosen (British or American).

Italics are used for all words of foreign languages, including generic and specific scientific names. Metric units and their international symbols should be used; if it is necessary to cite other systems of measurement, these can be added in parentheses. Temperatures should be given in the Centigrade (Celsius) scale. Numbers one to ten are written in full except when linked with a measurement abbreviation or higher number, thus 'five birds' but '5 km' and '5-12 birds'; numerals are used for all numbers above ten, four-figure numbers and above using the comma thus: '1,234', '12,345'. Single quotation marks are to be used. Details of experimental technique, extensive tabulations of results, etc., are best presented as appendices.

Citation: Reference citation in the text should follow the following formats. In

the case of multiple citations, the references should be cited in order of publication priority. In case of two publications with the same year, alphabetical order of priority should be followed.

1. Ricketts (2004) include a chapter analysing academic grammar and usage.; Wilson & Reeder (2005) include a chapter analysing academic grammar and usage.; and

Stuart et al. (2008) include a chapter analysing academic grammar and usage.

2. Various factors play a role in independent learning (Rodriguez 1999); Various factors play a role in independent learning (Groves 2001, 2003);

Various factors play a role in independent learning (Bhatt & Jayaram 2004; Ricketts 2004);

Various factors play a role in independent learning (Turner et al. 2008).

References: All references cited in the text should be quoted completely in this section. Journal names should be expanded. Please do not insert abbreviations. For example, expand PNAS to *Proceedings of the National Academy of Sciences*, or J. Bom. Nat. Hist. Soc. to *Journal of the Bombay Natural History Society*. References should be listed in the following format:

SUBMISSION DETAILS

All submissions to *JoSH* are considered complete only if the checklist of attachments (e.g. text, no. of tables, no. of images, figures, audio or video files, formats, etc.) is provided along with a letter listing all authors of the manuscript. We presume that authors from institutions with formalities have submitted manuscripts through the 'right channels'. Provide names, addresses and working email ids of at least three experts on the subject who would be appropriate reviewers for your manuscript. Make sure that at least one of the suggested reviewers is from a country other than yours.

Electronic: Electronic submission is preferred. Email to the Editor, *JoSH* at gc.iqac@gmail.com

Alternately, manuscripts should be submitted on a CD-Rom. Please ensure that a covering letter detailing all the files attached number of tables, figures, images, audio files, video files and appendices are spelt out. Text should be

in MS WORD. Scanned images of all figures and photographs should be in a different file or attached separately and must be of high quality JPEG or TIFF files (minimum 600dpi resolution). Maps should be marked with a scale and north arrow.

Hard copy: Hard copies are not mandatory. We encourage authors to provide high quality scans of images and figures. Only in rare instances we accept hard copies of originals if the authors are unable to provide electronic copies and the issue is of utmost urgency.

Review: Papers, Communications and Review articles will be reviewed by a minimum of three referees before being accepted. Notes will be reviewed by a minimum of two experts. Every manuscript will be assigned to a Subject Editor who, along with the Founding Editor, will be responsible in accepting or suggesting modifications to the authors.

Reprints: No reprints will be supplied to any author. In case you require high quality PDFs, contact us at gc.iqac@gmail.com

COPYRIGHT

The copyright of each paper published in *JoSH* will be the property of the authors as indicated in the first page of each article. All articles are registered under Creative Commons License 3.0 where by the contents can be used for non-commercial purposes providing adequate reference to the authors and the source of publication.

IMPORTANT NOTE

Articles submitted to *JoSH* are received under good faith as being based on

original research and has not been submitted, accepted or published elsewhere.

After preliminary assessment of the suitability of the manuscript for consideration in *JoSH*, status of the manuscript will be intimated to the corresponding author within 3 months. If the manuscript is found in need of minor corrections or additions, a tentative acceptance will be communicated in that time.

However, final acceptance will be communicated only after satisfactory changes have been carried out and accepted by the Subject Editor for publication.

The date of publication from the date of final acceptance depends on how fast the authors respond to the needs of the editorial office in making corrections to the proofs and submitting all files according to the format required by the publications department. To facilitate speedy publication from the date of first submission, ensure that the manuscript is reviewed by peers beforehand. This will potentially help your manuscript to be reviewed faster and with lesser suggestions for modification. For authors from countries with English as not the primary language, and for new authors, it is strongly recommended that you also get the text vetted for presentation, English language usage, grammar, typographical errors, consistency, etc. before submitting to *JoSH*. While we do consider manuscripts on their merit of research finding and conservation need, poorly written manuscripts will have a higher probability of rejection from reviewers and subject editors for difficulty in comprehending the subject.
